Dear Mr. Michael Davis

My name is Alberto Paros, currently studying Computer Science at Coventry University.

Hereby I apply to the "Software Engineering or Site Reliability Engineering Intern" position in the London office. However, should this position be unavailable or should you consider that I do not fit in with the requirements, I am open to any job opportunity available in the company. I would be available for this internship for 13 weeks from 1st August to 30th November 2022.

In 2022, I will graduate with a Bachelor's degree in Computer Science from Coventry University.

Besides my mentioned studies, I have been involved in development projects such as "Real World Project" which involved working with Sprint Development Life Cycle, "AR Unity Project", that required using C# to develop an AR game, and an individual project in which I used Java and SQL to create a Student Management System using Design Patterns.

It would be a tremendous opportunity to introduce myself to you in an interview. I feel that If I had the chance to prove my skills, you would get to know me better and hopefully, prove that I could be a great addition to your team.

Sincerely,

Alberto I. Paros
